KAMICO® Instructional Media, Inc.
STAAR CONNECTION™
Introduction

KAMICO® Instructional Media's program is validated by scientifically based research. **STAAR CONNECTION™ Diagnostic Series™** and **Developmental Series™** can be used in tandem to ensure mastery of Texas reporting categories and TEKS. The *Diagnostic Series™* consists of a bank of assessments. Each assessment covers a mixture of reporting categories and TEKS. This research-based format provides continual reinforcement for and ensures retention of mastered concepts. To take full advantage of this series, administer an assessment to students. After they have completed the assessment, use it as an instructional tool. Go over each item with the class, discussing all correct and incorrect answers. Then, use the assessment as a diagnostic tool to determine a standard for which students need remediation. Find that standard in the *Developmental Series™*.

Each book in the *STAAR CONNECTION Developmental Series™* consists of isolated activities and assessments to allow for the development of specific TEKS. For every TEKS, there is at least one individual or group activity. The activities provide a fun, challenging, yet nonthreatening, way to develop mastery of the TEKS. In addition to these activities, each *Developmental Series™* book has assessments on isolated standards to be used to identify mastery or the need for further skill development or reinforcement. Continue to alternate between the *STAAR CONNECTION™ Diagnostic Series™* and the *Developmental Series™*.

KAMICO's **DATA CONNECTION®** software prints student answer sheets on plain paper using a standard laser printer, scans answer sheets using a TWAIN-compliant scanner, scores assessments, and disaggregates student academic data, showing which goals and objectives are mastered and which goals and objectives are in need of reinforcement. The software is preprogrammed to work with all KAMICO® assessments. It is easily customized to work with other instructional materials and assessments as well as teacher-, school-, district-, or state-created assessments. **DATA CONNECTION®** analyzes academic data from individual students, classes, grade levels, and demographic groups. Reports are presented in tabular and graphic form. Item analysis is provided to help determine the most effective method of instruction.

KAMICO® Instructional Media, Inc., supports efforts to ensure adequate yearly progress and eliminate surprises in high-stakes test results.

Read the selection, and choose the best answer to each question. Then fill in the answer on your answer document.

Bo wrote about saving water by collecting rain. Read Bo's paper, and think about how it should be revised. Then answer the questions that follow.

Catching the Rain to Save Water

(1) People need to conserve water. (2) Though it may seem that water is all around us, only about 1 percent of the water on Earth is usable fresh water.

(3) The rest is locked up in ice. (4) It is also found in unusable salt water in our oceans. (5) This is why it is important to use water wisely. (6) Sweeping your driveway instead of hosing it off saves water.

(7) Luckily, you can conserve water by catching rain. (8) It is easy and only takes a little bit of time and money. (9) One way to collect rain is by putting rain barrels at the bottom of the downspouts on your house. (10) Rain barrels will catch all this rain as it runs off your roof and into your gutters. (11) Water from your roof is not drinkable, but it has other uses.

(12) Rain barrels come in many shapes and sizes. (13) All you need to do after installing your barrel is to connect a hose to the bottom of the barrel.

(14) Then, you can use the rainwater to water your flowerbed or lawn. (15) You can also use it to wash your parents' car or lawn equipment. (16) You can even use it to moisten a compost pile or the foundation of your house.

(17) Catching rain is a great way to save water.

- 3 Bo wants to add another supporting sentence to the second paragraph (sentences 7–11). He wants to add the sentence after sentence 9. Which would be the **BEST** supporting sentence for this paragraph?
- A Rain falls when water droplets in a cloud get too large and heavy to be kept up by the airflow within the cloud.
